

what is **Genomic Medicine**

Medical Genomics studies the link between gene and disease. This is a relatively new yet rapidly advancing field of medicine about which, as a patient, you may not have heard before.

Through early diagnosis and preventive treatment protocols, some diseases can be stopped before they occur. In the event that a disease does materialize, medication targeted against the disease-causing genes can be extremely effective at delaying the progression of the disease. Genomics-based treatment can dramatically improve the prognosis and greatly reduce the pain and misery of many illnesses otherwise considered incurable. Some clinical outcomes are clearly better than others.

You can help your physician today by subscribing to the *Clinical Outcomes Improvement Program* offered exclusively by Genomed. Fill out the enrollment form and send it to us.

ABOUT GENOMED, INC.

GenoMed, Inc. ("GenoMed") is a next-generation disease management company that uses medical genomics to improve patient outcomes.

GenoMed was founded by Dr. David Moskowitz, a Harvard and Oxford trained physician. His research on the angiotensin I-converting enzyme (ACE) gene beginning in 1993 and his laboratory discovery that ACE was a "master" disease gene has led to a spectrum of patent-pending medical treatment protocols. The ACE gene was found to be associated with about 160 common yet serious diseases such as type 2 diabetes, common cancers (except for prostate cancer in Caucasian men) and psychiatric diseases.

Dr. Moskowitz, a nephrologist, is a noted pioneer in the field of medical genomics and has been recognized for his groundbreaking treatment of diseases associated with the angiotensin I-converting enzyme such as chronic renal failure due to hypertension and type 2 diabetes, and emphysema. Dr. Moskowitz's innovative treatment protocols for viruses, including West Nile virus, avian influenza (bird flu) and SARS are also generating considerable scientific interest.

WHAT IS THE CLINICAL OUTCOMES IMPROVEMENT PROGRAM

GenoMed's Clinical Outcomes Improvement Program (COIP®) is an annual subscription-based patent-pending medical protocol service for medical patients and their treating physicians.

How Does It Work

As a patient, you subscribe to the service at your own expense. The subscription fee covers, among other things, any license fees and the consultations between GenoMed, you, and the physician of your choice. Please check with your medical insurance plan if they cover all or part of the fee, or with your accountant if the fee qualifies as a medically related tax deduction. All other additional costs, for medication

and doctor's visits should be covered by your insurance carrier.

You will receive agreements from GenoMed through which you authorize your physician to share your medical records with us. GenoMed, in turn, will provide your authorized physician access to patent-pending protocols specifically tailored to your medical needs. These protocols are unique for your particular case and without them you are missing out on some of the most advanced treatment protocols available in Western medicine. GenoMed's treatment protocols are available to patients anywhere in the world, provided they have Internet access.

Published Superior Clinical Outcomes	Pre Clinical Research
<p>Contact GenoMed now if you need more information about our COIP® program for the following diseases, or subscribe today:</p> <ul style="list-style-type: none"> ◆ Kidney failure due to type 2 ("adult onset") diabetes ◆ Kidney failure or Poor Circulation due to high blood pressure ◆ Emphysema (COPD) 	<p>Currently, collections are underway or scheduled for the following diseases for which we are looking for disease-predisposition genes:</p> <ul style="list-style-type: none"> ◆ Childhood cancers ◆ Cancers in people of Asian, African American and Hispanic origin
Diseases Currently in Clinical Trials	
<ul style="list-style-type: none"> ◆ Cancer, including leukemias and lymphomas ◆ HIV ◆ West Nile Virus ◆ Influenza and the Common Cold ◆ Hepatitis (A, B and C) ◆ Age-related macular degeneration ◆ Alzheimer's disease ◆ ALS ("Lou Gehrig's Disease") 	<ul style="list-style-type: none"> ◆ Multiple Sclerosis ◆ Alopecia ◆ Psoriasis ◆ Respiratory Syncytial Virus (RSV) ◆ Lupus ◆ Rheumatoid Arthritis ◆ Parkinson's disease ◆ Glaucoma

GENOMED COIP® ENROLLMENT

Yes, I want to enroll in GenoMed's Clinical Outcomes Improvement Program annual subscription service.

_____ name

_____ address

_____ city _____ state _____ zip code

_____ phone & email

I have discussed this subscription with my treating physician:

_____ name of physician

_____ address

_____ address

_____ city _____ state _____ zip code

_____ phone & email

who confirmed with me that (s)he is willing to participate in the GenoMed COIP®. I hereby authorize the above referenced physician to collaborate with GenoMed in identifying the most appropriate treatment protocol for me. I hereby submit the annual program fee.

_____ signature _____ date

Enclosed is a check or money order in the amount of U.S.\$800. Please make your check payable to GenoMed, Inc.

Please charge my credit card: American Express MasterCard VISA

_____ card number

_____ expiration date _____ name as it appears on the card

Make a photocopy of this form for your records, then mail the original to GenoMed at the address below.
